WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Remnant moisture combined with some instability will generate a slight risk of thunderstorms for parts of the northern interior each afternoon and evening into this weekend. Coastal locations can expect overnight low clouds and fog with partial clearing each afternoon.

San Francisco Weather:

Seasonable weather conditions and near normal temperatures can be expected through the weekend as a weak upper level low develops off the California coast.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Afternoon and evening thunderstorms are possible over the mountains the next few days, with the most coverage expected on Sunday and Monday. Near normal temperatures continue through the middle of next week.

Hanford Weather:

A dry westerly flow will prevail over Central California with a slight warming trend taking place. Another low will approach the Central Coast over the weekend lowering temperatures to near seasonal normals. Thunderstorms are possible during the afternoon hours over the crest of the southern Sierra Nevada. Otherwise precipitation is not expected for the next several days.

WEATHER

WEATHER SYNOPSIS BY REGION: (Cont.)

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A weak trough of low pressure over the West Coast will remain in place through the weekend then a high pressure system to the east will build west for next week. Onshore flow in place will keep night through morning low clouds and fog and a cooler air mass in place through Sunday, then a warming trend should occur for early next week. A monsoonal flow pattern could develop for late next week.

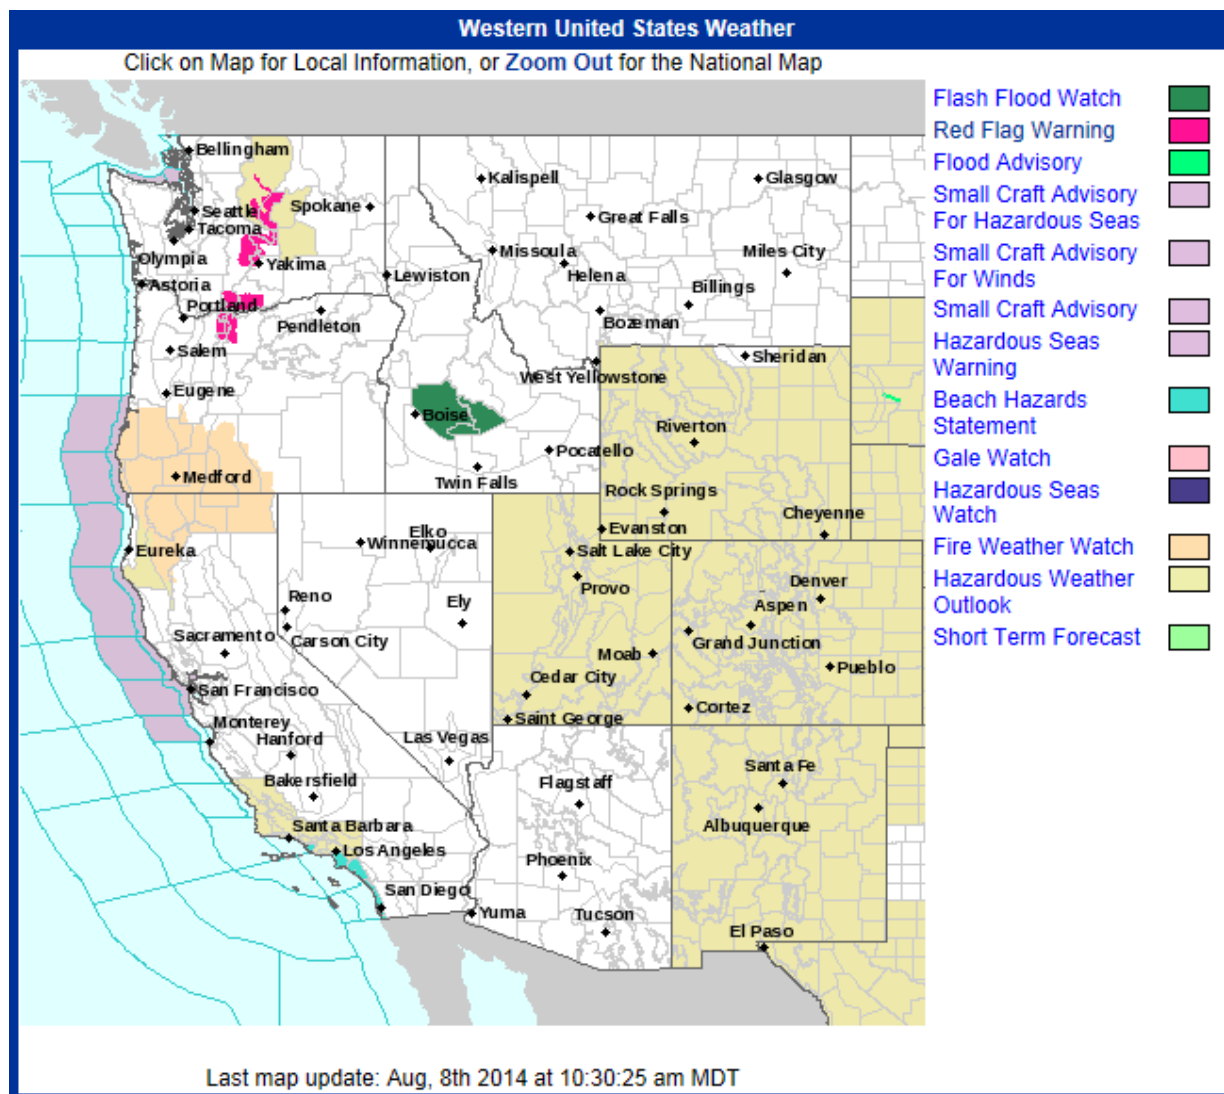

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A trough of low pressure over Central California will bring dry weather with seasonal temperatures into the weekend with night and morning low clouds and patchy fog for the coast and western valleys along with gusty west winds in the mountains and deserts in the afternoon and evening. Monsoonal moisture may bring afternoon and early evening thunderstorms to the mountains and deserts as early as Sunday and continuing into the middle of next week.

Southeast California Weather:

An increasing chance of clouds and showers beginning Friday and extending on into early next week can be expected. Temperatures will stay at or even below normals.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 7th: Don Pedro 43%; Exchequer 19%; Folsom Lake 41%; Lake Oroville 34%; Millerton Lake 51%; New Melones 25%; Pine Flat 12%; San Luis 21%; Lake Shasta 33%; Trinity Lake 34%; Pyramid Lake 93%; and Castaic Lake 46%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)

Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water¹ to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.

http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.

- Cal OES continues to gather drought-related costs from state agencies and local governments.
